

WILLIAM THOMPSON

Accra, Ghana | +233 242 123 801 | willyoks@gmail.com | github.com/yooku98
Full-Stack Engineer · AI Integration · SaaS & Data Products

PROFESSIONAL SUMMARY

Full-stack engineer with 2+ years building and shipping production SaaS applications under the YookuInc brand. Specialises in React, Supabase, Python, and AI integration using the Claude and OpenAI APIs. Delivered end-to-end products spanning insurance technology, women's health, and business analytics — from database design and API architecture to deployment on Vercel and Render. Comfortable owning the full stack independently and collaborating with product and design stakeholders. Background in data analytics and operational process optimisation provides strong business context alongside technical execution.

TECHNICAL SKILLS

Languages & Frameworks: JavaScript, TypeScript, Python, React, Node.js, Express, Vite

Backend & Database: Supabase, PostgreSQL, REST APIs, Supabase Auth, RLS, SQL

AI & Automation: Claude API (Anthropic), OpenAI API, n8n, Google Apps Script, Prompt Engineering

Data & Visualisation: Plotly Dash, Streamlit, Pandas, IBM Cognos, Power BI, SQL Analytics

Deployment & Tooling: Vercel, Render, Railway, GitHub, Git, Tailwind CSS, PWA

Payments: Paystack (Node.js/Express integration, KYC, webhook handling)

PROJECTS & PRODUCTS (YOOKUINC)

InsureTrack · React · Supabase · PostgreSQL · Vercel 2024 – Present

- Production-ready insurance management PWA for independent brokers, featuring role-based access control, Supabase RLS policies, and real-time KPI dashboards.
- Built commissions tracking module with per-policy custom values (GHS/percentage), renewals history timeline, clickable KPI cards with filtered policy views, and Excel export.
- Developed Google Apps Script email automation for broker outreach — initial emails, 3-day follow-ups, and reply tracking — operating from Gmail with daily triggers.
- Seeded demo environment with realistic Ghanaian insurance data for broker demonstrations; actively pitching to mid-tier independent brokers via NIC Ghana licensed list.

Moon Time · Streamlit · Claude API · Turso · Paystack · Node.js 2024 – Present

- Women's menstrual health app with AI-powered chatbot (Luna) built on the Claude API, with cycle data injected as system context for personalised responses.
- Migrated from ephemeral SQLite to Turso cloud storage via HTTP pipeline API after resolving Streamlit Cloud Rust toolchain incompatibility with libsql.
- Implemented multilingual support (English, Twi, Hausa, French), CSS grid cycle calendar with JS-to-Streamlit click bridge, and Plotly cycle comparison overlays.
- Built full Paystack payment integration (Node.js/Express on Render, Supabase PostgreSQL) for subscription paywall; KYC submitted and pending approval.

Plotly Dash Sales Dashboard · Python · Plotly Dash · Supabase · Render 2024

- Multi-tab analytics dashboard deployed on Render with Supabase Auth, dark mode theming, AI Insights tab (OpenRouter model rotation), and an expenses tracker with budget KPIs.

- Implemented full chart suite across sales, expenses, and trends tabs with drill-down filtering and AI-generated narrative summaries.

InvenTrack · *React · Turso · Railway · Netlify*

2024

- Inventory management web application with React frontend and Turso (libSQL) backend deployed on Railway, with full CRUD operations and category-based stock tracking.

PROFESSIONAL EXPERIENCE

Newrest Ghana — Process Control Officer / Graduate Trainee

Sep 2023 – Dec 2025

- Managed and optimised operational datasets (menu specifications, flight schedules, meal cycles) ensuring high data accuracy across airline catering operations.
- Applied SQL-based analysis and AI-assisted prompt engineering to automate reporting and accelerate operational summaries.
- Maintained real-time dashboards for operational visibility; conducted quality checks in compliance with SLA and QHSE standards.
- Coordinated workflows across operations, production, and logistics teams; prepared invoice controls aligned with contractual pricing.

Catfish Supreme — Digital Marketing Manager

Jan 2023 – Present

- Analysed campaign performance metrics to optimise audience targeting and engagement; generated customer insights to support marketing strategy.

Dansoman Polyclinic — Records Officer

Oct 2021 – Sep 2022

- Digitised and maintained patient records to improve documentation accuracy and audit readiness; supported protocol development for data-handling compliance.

EDUCATION & CERTIFICATIONS

Prompt Engineering for ChatGPT — Vanderbilt University (Coursera), 2026

IBM Data Analytics Professional Certificate — IBM Skills Network, 2024

BA Social Work — University of Ghana, 2017 – 2021

Diploma in Website Design — Open Labs, 2021
